

Love your look?
Refer a Friend.

Earn up to \$250 with the
Mentor Refer a Friend Program

LOVEYOURLOOK.COM

You've had breast augmentation with MENTOR® Breast Implants and are happy with your result.

Why not share the good news and inspire others?

As a plastic surgery patient, what better way to share your satisfaction with MENTOR® Breast Implants than by telling friends about your personal experience?

Receive up to a \$250 gift card.

The Mentor Refer a Friend Program rewards you for telling your friends about your breast augmentation experience. Receive a \$250 Visa® Prepaid Card* when a friend has breast augmentation surgery with MENTOR® MemoryGel® Breast Implants or a \$100 Visa® Prepaid Card for MENTOR® Saline Breast Implants.

This program is Mentor's way of saying thank you for recommending MENTOR® Breast Implants to women you care about.

Effective March 1, 2013 through December 31, 2013.

Limit one (1) Visa® Prepaid Card per referrer regardless of MENTOR® Breast Implant type.

*The third-party trademarks used herein are trademarks of their respective owners.

It's simple.

1

Visit www.LoveYourLook.com/ReferaFriend

Complete all required fields using the information provided by your surgeon at the bottom of this page.

2

Enter the name and email address of the friend you would like to refer. Click Submit. A referral code will

be automatically generated on the webpage for your records and an email will then be sent to your friend containing the referral code.

3

Once your friend has her surgery, the surgeon will certify that he/she performed the surgery using MENTOR® Breast Implants and voila! You will receive a corresponding Visa® Prepaid Card for referring MENTOR® Breast Implants.

Note to surgeons—Please be sure to include all the information below. Patients will not be able to participate without it.

Surgeon Name _____

Date of Breast Augmentation Surgery _____

Left Breast Implant Serial Number _____

Right Breast Implant Serial Number _____

Void where prohibited. Both the referring patient and the referred friend must undergo breast augmentation surgery using MENTOR® Breast Implants; breast reconstruction surgeries do not qualify. The Mentor Refer a Friend Program is not available where (1) either patient's surgery is reimbursable, in whole or in part, by any insurance program, private or public, including but not limited to Medicare, Medicaid and TRICARE; (2) either patient is a licensed health care professional or a staff member of a Mentor customer. Patients are encouraged to select a surgeon of their own choosing after conducting their own investigation into the particular surgeon's training, education and experience.

Gift cards will be processed 6-8 weeks after Mentor Worldwide LLC receives the verified information.

Important Safety Information:

MENTOR® MemoryGel® and Saline-filled Breast Implants are indicated for breast augmentation - in women who are at least 22 years old for MemoryGel® Implants and at least 18 years old for Saline Implants - or for breast reconstruction.

Breast implant surgery should not be performed in women:

- With active infection anywhere in their body
- With existing cancer or pre-cancer of their breast who have not received adequate treatment for those conditions
- Who are currently pregnant or nursing.

Safety and effectiveness have not been established in patients with autoimmune diseases (for example lupus and scleroderma), a weakened immune system, conditions that interfere with wound healing and blood clotting, or reduced blood supply to breast tissue. Patients with a diagnosis of depression, or other mental health disorders, should wait until resolution or stabilization of these conditions prior to undergoing breast implantation surgery.

There are risks associated with breast implant surgery. You should be aware that breast implants are not lifetime devices and breast implantation is likely not a one-time surgery. You may need additional unplanned surgeries on your breasts because of complications or unacceptable cosmetic outcomes. Many of the changes to your breast following implantation are irreversible (cannot be undone) and breast implants may affect your ability to breastfeed, either by reducing or eliminating milk production.

The most common complications with MemoryGel® Breast Implants include reoperation, capsular contracture, asymmetry, and breast pain. A lower risk of complication is implant rupture, which is most often silent (meaning neither you nor your doctor will know you have a rupture). MRI screenings are recommended three years after initial implant surgery and then every two years after to detect silent rupture.

The most common complications with MENTOR® Saline-filled Breast Implants include reoperation, implant removal, capsular contracture, wrinkling, breast pain and deflation.

Detailed information regarding the risks and benefits associated with MENTOR® Breast Implants is provided in two brochures, *Important Information for Augmentation Patients about MENTOR® MemoryGel® Silicone Gel-Filled Breast Implants* or *Saline-Filled Breast Implants, Making an Informed Decision* available from your surgeon or on line at www.mentorwwllc.com. It is important that you read and understand these brochures when considering MENTOR® Breast Implants.
